

Earth Day 2024's theme is "Earth vs Plastics"

At its last Council meeting, Council approved to recognize Earth Day 2024 by launching our Blue/Grey Box Recycling project, in partnership with Infrastructure Canada, Canada Community-Building Fund on two occasions – **Tuesday April 23rd and Saturday April 27th.**

What will Calvin Township's recognition of Earth Day 2024 look like?

Council members based on their personal availability, will be on site at the landfill throughout both days day to greet Calvinites and to distribute to them, blue and grey boxes, as well as fridge magnets that point out what to can go into each box.

The magnet tells the story of how sorting works in our area– for citizens and ourselves as the collectors of the blue box recyclable materials.

(The magnet is a template used by the organization heading up the blue box transition program)

One "bundle" per Calvin household (as per MPAC and our tax file list) will be available for pick up at the landfill beginning April 23rd.
